**State of Origin:** Kogi State

## Profile

A Full-Stack Web Developer with expertise in both front-end and back-end development. My proficiency includes HTML, CSS, and JavaScript, with which I have created visually appealing and responsive user interfaces. Other experiences front-end frameworks like React, Next.js to build dynamic and interactive web applications.

On the back-end, my skill includes server-side languages like Node.js I have worked with databases such as MongoDB, Postman. In addition to my technical skills, I am well-versed in control systems.

## Education

- |                                                                                                                 |           |
